CORE SKILLS

Backend & Frameworks

C# · ASP.NET Core · EF Core · VB.NET · REST/OpenAPI

Cloud & DevOps

Azure (App Config, Key Vault, App Insights, Service Bus, Blob Storage, Redis, Functions) · AWS (S3, SQS) · Azure DevOps · Buildkite · Git

Databases

SQL Server · Oracle · PostgreSQL · MySQL · MongoDB

Scripting & Markup

SQL · JavaScript · HTML5/CSS3 · ABAP

Enterprise & ERP

SAP (Material Management MM, Production Planning PP, Controlling CO, ABAP) · SAP–MES integration

AI-Assisted Development

Cursor

Portal & Reporting

Retool · TIBCO Spotfire

CAREER PROFILE

Dynamic Senior Software Engineer with over 15 years of expertise in crafting and optimizing enterprise applications, enhancing operational workflows, and integrating innovative solutions. Proficient in the complete software development lifecycle and recently focusing on AI-driven technologies to foster efficiency and smarter operations.

PROFESSIONAL EXPERIENCES

EMAPTA, PNB Manila, Philippines

2021 – Present

Backend Developer

2023 – 2026

Client: Discovery Holiday Parks AU

<https://discoveryholidayparks.com.au> · <https://wikicamps.com.au>

- Built and maintained the Deals and WikiCamps domain, focusing on RESTful API implementation and EF Core data access for reliable, scalable platform integration.
- Contributed to a microservices-based architecture for the WikiCamps platform, delivering shared services across sites, forums, accounts, trips, and media modules.
- Took ownership of the Admin Portal (Retool) for deals, bookings, and WikiCamps — including pages, resource/query configuration, and multi-environment setup.
- Worked extensively with Azure services: Key Vault, Application Insights, Redis Cache, Blob Storage, Service Bus (message handlers), and Azure Functions (media resizing, scheduled jobs, offline builder).
- Integrated external and internal services such as BookEasy (bookings), OSRM (routing) with Polly resilience policies, and Azure AI Search for content indexing.
- Used Cursor (repository-level rules, MCP for read-only Azure/SQL access) to support AI-assisted development; ensured all changes were reviewed and validated before merge or execution.

.NET Developer

2021 – 2023

Client: Optima Technology AU

<https://optimatech.io>

- Collaborated in the development of a highly scalable web application architecture utilizing AWS S3 and SQS for efficient and reliable storage and messaging solutions.
- Responsible for the design, development, refactoring, and maintenance of the Optimatech application, implementing efficient and reliable best software practices.
- Participated in code review sessions, enforcing coding standards and maintainability.
- Created and maintained top-notch functional and technical documentation using Confluence, resulting in a 50% improvement in knowledge sharing and software development and troubleshooting efficiency.
- Successfully deployed code to Test, UAT, and production environments using Buildkite, ensuring minimal downtime and efficient releases.
- Oversaw the accuracy of meter data, ensuring a 99% data quality rate.

Senior Engineer

2011 – 2021

Renesas Semiconductor KL SDN BHD, Kuala Langat, Malaysia

- Maintained 99% uptime for the Manufacturing Execution System (MES), ensuring reliable production operations.
- Designed and delivered automation solutions by analyzing production workflows, collaborating with users, and resolving system bottlenecks — increasing productivity by 75%, generating over MYR 1M in time savings, and implementing Poka-Yoke (mistake-proofing) processes.
- Administered over 100 servers running on physical, VMware, and Hyper-V infrastructure, including in-house and Japan Software databases running on Oracle and MS SQL.

- Developed system integrations between SAP and MES, automating material master registration and production planning processes.
- Built interactive management dashboards and analytics using TIBCO Spotfire, enabling faster operational insights and decision-making.

IT Manager / IT Executive

2008 – 2010

Grand Dragon Resorts, Chrey Thom, Cambodia

- As IT Manager: led project planning, resourcing, documentation, and client engagement; cleared risks so deliverables shipped on time.
- As IT Executive: delivered in-house Point of Sales (POS), Casino Management (CMS), and Automated Timekeeping System with Biometric (ATS); fully automated previously manual processes where applicable.

Senior Programmer / Junior Programmer

2005 – 2008

Subic Bay Yacht Club, Subic Bay Olongapo, Philippines

- As Senior Programmer: designed and built club systems covering employment, payroll, timekeeping, billing/collections, accounts payable, and POS for revenue centres and retail.
- Administered Windows Server, SCO UNIX, Novell NetWare, Oracle OPERA 4.04 PMS, and Micros-Fidelio; handled database tuning, indexing, and security.
- As Junior Programmer: performed day-to-day monitoring of systems and databases (99% uptime target), built custom programs, evaluated vendors, and provided front-line IT support for members and staff.

PROFESSIONAL CERTIFICATIONS

- OpenAI Academy: Agent and Workflows (2026)
- No Code Automation with Zapier (2026)
- QS101: N8N Quickstart (2026)
- The Complete ReactJs Course - Basics to Advanced (2026)
- Google AI Studio Bootcamp: Build Pro Apps with Gemini (2026)
- Claude Pro: Build, Integrate & Optimize AI Solutions (2026)
- Learn Infra as a Code with Azure Bicep (2025)
- Learn Azure DevOps CI/CD pipelines (2025)
- Code Reviews for Secure, Clean, and Scalable Code (2024)
- Data Engineering Pathway (2023)
- Data Science and Machine Learning Using Python (2022)

EDUCATION

Bachelor of Science, Computer Science — STI-College Olongapo 2004

Achievements: Two-time Champion in 'INTO PROGRAMMING' Tagisan ng Talino (Regional and National Level), Deans Lister and Honorable Mention and Programmer of the Year
