Patrick James Lee Gonzaga

Senior Software Engineer | Backend, Cloud & AI Automation

patrickgonzaga@gmail.com | +63 929 492 4510 | linkedin.com/in/patgonzaga | patgonzaga.dev

PROFESSIONAL SUMMARY

Software engineer with 2 decades of experience across software development, enterprise applications, databases, integrations and IT systems, with 5+ years of C# / modern .NET and 15+ years of VB.NET enterprise experience.

TECHNICAL SKILLS

Backend: C#, VB.NET, .NET, ASP.NET Core, EF Core, REST APIs, enterprise integrations.

Cloud & delivery: Azure, AWS S3 / SQS, Docker, Linux, Bicep, GitHub Actions, Azure DevOps, Buildkite, Git, SonarQube, Snyk, xUnit.

Data & enterprise: SQL Server, Oracle, PostgreSQL, MySQL, MongoDB, SAP, Retool, TIBCO Spotfire.

AI & automation: Node.js, n8n, Claude / Claude Code, MCP, OpenClaw, Google OAuth / Drive API, Markdown / Obsidian, OpenAI API.

PROFESSIONAL EXPERIENCE

Backend Developer

Discovery Holiday Parks / Emapta | 2023 – 2026 | Australia (Remote)

- Built and maintained C# / .NET / ASP.NET Core APIs and EF Core data access for Deals and WikiCamps, contributing shared services across sites, forums, accounts, trips and media.
- Delivered event-driven workflows with Azure Service Bus, Functions, Redis, Blob Storage, Key Vault and Application Insights; integrated BookEasy, OSRM with Polly, and Azure AI Search.
- Owned the Retool Admin Portal, including pages, resources, SQL queries and multi-environment configuration for deals, bookings and WikiCamps.
- Enforced SonarQube code quality, security and coverage standards; used Cursor and MCP for read-only Azure / SQL context, reviewing and validating changes before release.

Technologies: C#, .NET, ASP.NET Core, EF Core, REST APIs, Azure (Key Vault, Application Insights, Redis, Blob Storage, Service Bus, Functions, AI Search), SQL Server, Retool, Polly, SonarQube, Cursor, MCP.

.NET Developer

BidEnergy / Emapta (Optima Technology) | 2021 – 2023 | Australia (Remote)

- Built, maintained and refactored C# / .NET energy applications, using AWS S3 and SQS for scalable storage and reliable asynchronous messaging.
- Applied Clean Architecture, code reviews and Snyk security scanning; automated validation maintained 99% meter data accuracy.
- Delivered releases across Test, UAT and Production using Buildkite CI/CD with minimal downtime.
- Created functional and technical documentation in Confluence, improving knowledge sharing and troubleshooting efficiency by 50%.

Technologies: C#, .NET, AWS S3, AWS SQS, Buildkite CI/CD, Snyk, Clean Architecture, Confluence.

Senior Engineer

Renesas Semiconductor KL SDN BHD | 2011 – 2021 | Kuala Langat, Malaysia

- Served as a senior engineer managing and scaling 24/7 Manufacturing Execution Systems (MES) and enterprise IT applications across 100+ production, VMware, and Hyper-V servers.
- Engineered custom VB.NET, SQL Server, and Oracle solutions that boosted floor productivity by 75% and delivered > MYR 1M in verified time-saving operational benefits.

- Architected the Electronic Lot Control Slip (e-LCS) and e-Counting Balance System, implementing poka-yoke validation to eliminate lot-mixing defects and save up to 800,000 scrapped component pieces.
- Integrated SAP with MES to fully automate material master registration and production planning runs, eliminating manual data entry cycles.
- Built internal RSKL Helpdesk ticketing system (VB.NET, ASP.NET, SQL Server) and real-time Spotfire manufacturing analytics dashboards for operational leadership.

Technologies: VB.NET, ASP.NET, SQL Server, Oracle, SAP, MES, TIBCO Spotfire, VMware, Hyper-V.

IT Manager / IT Executive

Grand Dragon Resorts | 2008 – 2010 | Chrey Thom, Cambodia

- As IT Manager: led end-to-end project planning, infrastructure deployments, documentation, and stakeholder management for resort systems.
- As IT Executive: designed and delivered the Resort Operations System Suite — Point of Sale (POS), Casino Management System (CMS), and Biometric Timekeeping (ATS) using VB.NET and SQL Server.

Technologies: VB.NET, PHP, SQL Server, POS, Casino Management System, biometric timekeeping.

Senior Programmer / Junior Programmer

Subic Bay Yacht Club | 2005 – 2008 | Subic Bay, Philippines

- Developed custom VB.NET and SQL Server applications for payroll, employee timekeeping, billing, collections, accounts payable, and POS.
- Administered multi-platform infrastructure including Windows Server, SCO UNIX, Novell NetWare, Oracle OPERA PMS, and Micros-Fidelio systems, maintaining 99% database uptime.

Technologies: VB.NET, SQL Server, Windows Server, SCO UNIX, Novell NetWare, Oracle OPERA PMS, Micros-Fidelio.

EDUCATION

Bachelor of Science in Computer Science | STI-College Olongapo | 2004

Two-time champion, INTO PROGRAMMING Tagisan ng Talino (regional and national); Dean's Lister, Honorable Mention and Programmer of the Year.
